## 10,000 Nets For Laos

Help Prevent Malaria - \$10 Buys One Net

August 2008

Vol 1 No. 12

### Malaria Epidemic in Northern Laos

Cerebral malaria is rampant in northern Laos. Child mortality is close to 50% for children under 5 years of age. There is a great need for mosquito nets. We work to deliver more than 10,000 nets to the Akha villages of northern Laos to help combat this deadly disease. More than 60,000 Akha live in Laos.

### Across the US By Horseback for Akha Human Rights

You can make a difference in the lives of the Akha people. 500,000 people living in five countries of SE Asia, the Akha experience some of the most distressful human rights conditions in the region.

To promote recognition of the Akha people and the conditions they face, to gain support for health and education in their communities, we are making this trip from city to city across the US by horseback.

Your help is needed. With your help we can prevent malaria and protect the most basic rights of the Akha people.
